AI Document Lineage

System Data Flow & Truth Delta Pipeline

How raw government records and field survey pins convert into a certified Land Passport node.

Data Processing Pipeline (End-to-End Lifecycle)

STEP 1 • INGESTION

Extract Jamabandi, Khatiyan, registered deeds via instant portal sync & upload.

STEP 2 • FIELD SURVEY

Field Amin logs GPS pins (P1..P4), Chauhadri occupant verification, and road width.

STEP 3 • TRUTH DELTA

Calculate area delta (Δ_{area}), boundary variance, and tribal CNT/SPT restrictions.

STEP 4 • PASSPORT

Generate tamper-evident Land Passport with QR code and publish to Property Graph.

Spatial Discrepancy Formulation

$$\Delta_{\text{area}} = \frac{\text{GPS Area} - \text{Deed Area}}{\text{Deed Area}} \times 100$$

- $|\Delta| \le 4\% \implies$ Customary variance (Clean)
- $4\% < |\Delta| \le 10\% \implies$ Warning (+15 Risk Score)
- $|\Delta| > 10\% \implies$ Severe boundary deficit (+30 Risk Score)

The 6-Dimension Deterministic Risk Engine

1. **Title & Lineage:** Sale deed vs Khatiyan chain match.
2. **Spatial Variance:** Measured vs Jamabandi acre delta.
3. **Tenancy Laws:** CNT/SPT Act tribal transfer restriction.
4. **Mutation Compliance:** Dakhil Kharij + Lagan receipt audit.
5. **Physical Encroachment:** Chauhadri ridge conflicts.
6. **Access & Litigation:** Motorable road & CrPC 144 checks.
