BHUMISETU

FLAGSHIP PRODUCT LAUNCH PACK 1.0

Launch-ready scopes, intake, deliverables, exclusions, workflows, pricing logic, and sales language for BhumiSetu's first three flagship offers.

Sell a defined decision outcome. Deliver only what is scoped. Never imply legal certification, government authority, or guaranteed safety.

1. Portfolio Rules

- Begin complex cases with a paid consultation.
- Use a written scope, exclusions, timeline, customer responsibilities, and payment terms.
- Treat survey, legal review, valuation, and documentation work as separate professional modules.
- Do not combine services merely to increase ticket size.
- Capture customer feedback, proof, and reusable intelligence after closure.

2. Pre-Purchase Land Decision Review

Field	Definition
Priority segment	Serious land buyers with a specific parcel under consideration
Customer promise	Help the customer understand the parcel, visible uncertainties, available information, practical suitability, and next steps before committing further money.
Typical trigger	Shortlisted parcel, token discussion, negotiation, registry preparation, or family approval.
Indicative timeline	Typically 5-10 working days after complete inputs and site access.
Pricing logic	Base consultation + modular charges for site visit, survey, professional review, travel, and urgent turnaround. Final fee must follow actual cost validation.

Intake checklist

- Customer purpose and intended use
- Land location and site contact
- Available records and maps
- Seller/broker information
- Decision deadline and token status
- Known concerns and conflicting information

Included scope

- Structured consultation
- Document checklist and available-record review
- Site-visit or survey coordination where selected
- Boundary/access/usability observations
- Local information capture with source distinction
- Decision summary: observations, unresolved questions, and next actions

Deliverables

- Written decision summary
- Evidence/photo appendix where included
- Required-document and unresolved-question checklist
- Recommended professional or process next step

Explicit exclusions

- Legal title opinion or guarantee

- Government certification
- Registered valuation unless separately arranged
- Guarantee of price appreciation, approval, mutation, registry, or dispute-free status
- Hidden defects or information not reasonably available

Recommended sales language

Before recommending any survey or document service, we first identify what decision you are making and what remains uncertain. The output is a structured summary of what is understood, what is unresolved, and what you should do next.

Operational workflow

- Lead qualification
- Paid consultation
- Internal feasibility and cost review
- Written proposal and advance
- Document/site readiness
- Execution and evidence capture
- Quality review
- Decision output
- Payment closure
- Feedback, proof, referral, and intelligence capture

3. Family Land Clarity Program

Field	Definition
Priority segment	Families dealing with inherited, joint, partition, boundary, construction, or record-related land
Customer promise	Create a shared factual foundation for understanding the land, stakeholders, records, boundaries, and next process.
Typical trigger	Partition discussion, inheritance, construction, sale, mutation, family disagreement, or suspected encroachment.
Indicative timeline	Typically 7-20 working days depending on parcels, stakeholders, records, and survey requirements.
Pricing logic	Consultation fee + parcel/stakeholder complexity + survey/field work + professional coordination. Advance required before scheduling.

Intake checklist

- Family objective and stakeholders
- Relationship and decision-maker map
- Land location and total parcels
- Available records, maps, and prior measurements
- Known disagreements or sensitivities
- Expected meeting, construction, or transaction date

Included scope

- Family case consultation
- Stakeholder and document map
- Survey/demarcation coordination where selected
- Existing-boundary and site observations
- Partition/layout support within professional capability
- Written clarity report and next-step pathway

Deliverables

- Family land case summary
- Stakeholder/action matrix
- Survey/map outputs where included
- Unresolved issue list
- Recommended next meeting or professional process

Explicit exclusions

- Judicial dispute resolution
- Binding adjudication of family shares
- Legal opinion unless separately provided by qualified counsel
- Coercive mediation or representation of one side without disclosure
- Guarantee of agreement among family members

Recommended sales language

The purpose is not to take sides. BhumiSetu helps create a structured factual foundation so the family can understand the land, records, boundaries, unresolved issues, and appropriate next process.

Operational workflow

- Lead qualification
- Paid consultation
- Internal feasibility and cost review
- Written proposal and advance
- Document/site readiness
- Execution and evidence capture
- Quality review
- Decision output
- Payment closure
- Feedback, proof, referral, and intelligence capture

4. Remote Land Management

Field	Definition
Priority segment	Migrant and NRI owners who cannot supervise their land locally

Customer promise	Provide accountable local observation, evidence, coordination, and periodic reporting without pretending to replace legal ownership control.
Typical trigger	Planned sale, construction, family partition, suspected encroachment, periodic review, or inability to visit.
Indicative timeline	Initial setup 5-10 working days; recurring service monthly, quarterly, or milestone-based.
Pricing logic	One-time setup fee + per-visit charges + recurring coordination/reporting retainer + third-party and travel costs. Prefer advance subscription.

Intake checklist

- Owner identity and authority
- Land portfolio and locations
- Local contacts and access permission
- Available records
- Immediate concern and reporting frequency
- Activities BhumiSetu is authorized to coordinate

Included scope

- Remote consultation and case setup
- Scheduled site visit and evidence capture
- Survey/professional coordination where selected
- Local status observations
- Document/process follow-up assistance
- Periodic written or video update
- Issue escalation and next-action recommendations

Deliverables

- Initial portfolio/case register
- Visit report with dated evidence
- Action tracker
- Periodic status report
- Escalation note for material change

Explicit exclusions

- Possession guarantee or physical security service
- Legal representation without separate counsel
- Authority to sell, transfer, sign, or make ownership decisions
- Guarantee against encroachment or misconduct
- Cash handling or unofficial government payments

Recommended sales language

BhumiSetu provides a professional local visibility and coordination layer. We document what is observed, manage agreed tasks, and escalate issues; we do not issue ownership guarantees or act beyond written authority.

Operational workflow

- Lead qualification
- Paid consultation
- Internal feasibility and cost review
- Written proposal and advance
- Document/site readiness
- Execution and evidence capture
- Quality review
- Decision output
- Payment closure
- Feedback, proof, referral, and intelligence capture

5. Launch Readiness Checklist

Requirement	Status to Confirm
Approved price card	Actual direct costs and margin reviewed
Intake form	Customer data and authorization fields ready
Proposal template	Scope, deliverables, exclusions, payment and validity
Operations checklist	Owner, equipment, evidence and QA
Report template	Standard written output prepared
CRM fields	Product, stage, source, collection and outcome
Proof workflow	Consent, testimonial, review and case-study request
Professional network	Required lawyer/engineer/valuer partners identified

6. First 25-Case Validation

- Track lead source, segment, urgency, conversion, price accepted, direct cost, delivery time, gross profit, satisfaction, rework, and referral.
- Do not lock permanent pricing until enough cases reveal actual cost.
- Review each lost proposal and each operational re-scope.
- Choose the two strongest products for aggressive local distribution after evidence.

7. Decisions Locked

- These three products are BhumiSetu's priority launch offers.
- Pricing remains controlled by the Finance OS and actual cost validation.
- Every product creates a written customer output.
- No product uses verification-certificate or guarantee language.
- Custom work is allowed only through documented scope and commercial approval.
